EndoSoft ENR®

Comprehensive Perioperative Documentation

EndoSoft ENR® makes it easy to create comprehensive perioperative documentation. From patient history and procedure reports to vitals monitoring and scheduling, EndoSoft ENR® streamlines workflow and increases efficiency. Administrative features like time and material billing and inventory management are integrated directly within the application, saving valuable time, resources and cost, allowing you to focus on quality of care. The application also interfaces directly with HIS and EHR systems affording Meaningful Use adoption.

Compliant Perioperative Documentation & Quality Reporting

EndoSoft ENR® is compliant with both SGNA and AORN standard language and data sets, resulting in seamless integration with a facility's current processes and procedures. The application also meets the compliance standards of The Joint Commission, HIPAA, HHS OIG and other regulatory bodies, ensuring quality documentation, reporting, privacy and patient care. Integrated G-Codes ensure compliance with Medicare guidelines for ASCs.

Medication Reconciliation

An integrated medication reconciliation feature significantly reduces the chance of medication errors, improving patient safety.

Automatic Vitals Recording

Patient vitals are recorded and monitored automatically throughout the procedure process.

Patient Tracking

Patient Tracking allows nurses to manage, monitor and track the flow of patients through a facility.

Inventory Management

The Inventory Management tool enables the appropriate staff to order, access, track, charge and maintain medical inventory levels. The tool also monitors equipment repairs and sterilization as well as manages vendors and purchases. Detailed reports are readily available for repairs, sterilization, inventory, reorders and items list.

Time and Material Billing

Integrated time and material billing accurately tracks facility utilization and materials used by site, room and physician.

Nursing History Evaluation

Nursing History Evaluation

Patient Information: Black, Franklin, DOB 4/16/1952, Encounter 8, Procedure Proposed: Colonoscopy - banding, Patient Location: Endoscopy - Block 00A.
