

EndoSchedule®

State-of-the-Art Patient Scheduling Application

EndoSchedule® is a patient scheduling application designed for use in all types of medical facilities, from a solo physician's office to large multi-site medical centers.

The application is designed to work seamlessly with all EndoSoft products allowing your entire health care information process to be fully integrated.

Features:

- ✓ Supports multiple departments, hospitals and locations
- ✓ Schedule patient, physician, equipment and rooms
- ✓ Block rooms by procedure, physician and equipment
- ✓ Wait list patients based on ICD-9 and ICD-10 codes
- ✓ Supports HL7 ADT and SIU messages
- ✓ Generate procedure related consent forms
- ✓ Automated scheduling based on physicians profile
- ✓ Web portal for referring physicians to schedule patients
- ✓ Developed in line with HIPAA and The Joint Commission rules and regulations
- ✓ Generate statistical reports for physicians, nurses, room and equipment utilization, cancellations, no show and reschedule patients
